City Manager Kreighbaum told the Commissioners that the Planning Commission, at its March 2 meeting, voted unanimously to recommend that the City Commission give prompt consideration to the improvement of East 11th Street, east of Hill Street, in whatever manner they deemed equitable. He indicated that adjoining property owners were, apparently, not interested in petitioning for the paving project and that two other alternatives existed for the improvement:

1. Designate (by ordinance) the street as a main trafficway which would allow the city-at-large to pay 100% of the improvement cost; unless, however, a protest petition signed by qualified electors equal in number to 10% of those voting in the last preceding regular local election was received. Such a petition would require the City Commission to hold an election on the improvement.

2. Pay a maximum of 90% of the improvement on a city-at-large basis with a minimum of 10% being assessed to a benefit district. A protest petition signed by 51% of the resident owners of record and the owners of over half of the land in the benefit district would, however, block this method of improvement.

The Commission indicated that they would consider the recommendation.

Gibbs of Wilson and Co., Engineers, were present to discuss their recommendations with the City of Concordia, and to fulfill E.P.A. requirements for obtaining a grant for the design and construction of the proposed facilities and the environmental effects of the proposed wastewater system. No other formal statements were presented.

Mr. Verlyn Ebert of the Kansas Fish & Game Commission was present to question Wilson & Co. Engineers about the adaptability of the three plans in regards to possible future tertiary treatment requirements. He also questioned whether or not any of the three alternates considered resulted in a better quality effluent being discharged into the Republican River.

Mr. Gibbs indicated that both alternates No. 1 and No. 2 could be more easily adapted to tertiary treatment than alternate No. 3, and that all three alternates resulted in approximately the same quality of effluent.

Robert Fischer, President of St. Joseph's Hospital, inquired as to the priorities given the various steps of the facilities plan.

City Manager Kreighbaum indicated that the City had instructed Wilson & Co. to give first priority to the two main interceptor lines as outlined in the facilities plan.

There being no further questions, motion was made by Mayor Humes, seconded by Commissioner Krob and carried by the affirmative vote of the entire commission to incorporate the minutes of the public hearing into the regular minutes of the city commission meeting for submission to the EPA.
